

- Problem:- In hostel mess on weekends many girls go to home without informing so mess owner don't have idea how many girls are coming for dinner or lunch so food waste a lot. for this we have to make an application to make mess owner job easy

1) Executive summary snapshot :-

- Research has shown that we need to help mess owner by developing an application.
- The scope of proposed project is very high because it is common problem in every mess.
- The main business drivers behind it are mess owner.

2) Project description :-

- While the current process allows us to make application for one mess if few days it allows us to make application for many mess.
- challenges are :-
We need to take data of mess & girls and also a team to make an application.

DATE / /

- We need to take project because it will help mess owner job easy & we will also reduce the amount of food which is wasting and we will also get profit by getting this profit.

3) Project scope:-

- project goals:- Help mess owner, we will also able to save food from wasting and gain profit.

- Tasks:- Our task is that we will make an application to make common people life easy and which they use easily.

- App feature is that girls are able to upload there presenty or absenty on weekend so mess owner know about the no. of girls.

- costs:- We need app 50,000 amount in which we need to give 10,000 amount to copyright of website, 5000 amount to team, to develop an app etc.

- Deadline:- By discussing with team we will give certain deadline like in 4 months we will give you an app.
